16. ABSTRACT

The changes and causes of reduced visibility in the Eastern U.S. during the past three decades were examined. Contour maps of local midday extinction coefficients (inversely related to visibility) are presented for the years 1973-1977. Daily mean extinction coefficient maps illustrate the formation and movement of air masses with reduced visibility; they are supplemented by tables and stripcharts of regional meteorological parameters.

ABSTRACT

The changes and causes of reduced visibility in the Eastern U.S. during the past three decades were examined. Contour maps of local midday extinction coefficients (inversely related to visibility) are presented for the years 1973-1977. Daily mean extinction coefficient maps illustrate the formation and movement of air masses with reduced visibility; they are supplemented by tables and stripcharts of regional meteorological parameters.

This report was submitted in partial fulfillment of EPA Grant No. R803896 by the Center for Air Pollution Impact and Trend Analysis (CAPITA) under the sponsorship of the U.S. Environmental Protection Agency. This report covers a period from January 1, 1978 to June 30, 1979, and work was completed as of July 31, 1979.

Appendix F
Daily and Quarterly Extinction Coefficient Contour Maps
1973-1977

NOTE:

Appendices A-F are continuations of a published report entitled HISTORICAL VISIBILITY OVER THE EASTERN U.S. Daily and Quarterly Extinction Coefficient Contour Maps, EPA-600/3-80-043a. This report contains background information and documentation of the data volume for the study and presents daily contour maps of light extinction coefficients for the Eastern U.S. in 1978; these are supplemented by tables and stripcharts of regional meteorological parameters. Plots of quarterly average extinction coefficients from 1948-1978 are also included.
